

*The consortia of PISa and SIM projects  
are pleased to announce the*

## **1<sup>st</sup> joint workshop on motorcycle integrated safety**

The workshop will be held on 29<sup>th</sup> of May, 2008 in Bologna (Italy)

*The event is an opportunity to present some key research issues in the area of Powered Two Wheelers (PTWs) safety systems, aimed at improving their overall performances. It is also a great opportunity for partners with different backgrounds (researchers, industrials, public authorities, EC representatives) for networking and discussing about PTWs' safety.*

*The University of Florence and Piaggio will respectively present the first outcomes from the above mentioned research projects.*

*A roundtable with authorities, industry and universities will close the workshop.*

*The PISa project (Powered-two-wheelers Integrated Safety) aims at developing and implementing "reliable and fail-safe" integrated safety systems for a range of PTWs, that can be linked to secondary safety devices. See <http://www.pisa-project.eu/>*

*The SIM (Safety In Motion) project aims at developing an innovative vehicle with new active, preventive and passive safety devices. See <http://www.sim-eu.org/>*

***NEWS on ROAD and PTWs' SAFETY will be outlined!!!***

*The event will last approximately from 9.00 to 17.00. Participation to this event is free of charge, including lunch.*

*More details will be given shortly.*
